**ACCESSORY**

## STEEL SHUTTER SYSTEMS

It is generally used in jewellery shops, stores, pharmacies and places that constitute security and is produced from heavier and thicker material compared to other types of shutters. Steel shutter systems can be prepared in all colours in the RAL Catalogue. Steel shutters are resistant to impact and explosive materials. Steel Shutters are profiles where opening safety is at the forefront with remote control or button.

## ALUMINIUM SHUTTER SYSTEMS

The lamellas made of aluminium raw material in the Automatic Shutter Systems product schedule are divided into two as Polyurethane and Extrusion. Due to the aesthetic appearance and material structure of the lamellas, it is foreseen that they are suitable for application indoors. Aluminium Shutters are generally used in (Shopping Mall, HOSPITAL, AIRPORT, etc.) areas.

## WHY US

- > Product and service quality that emphasises high technology and aesthetics
- > Strong production infrastructure that emphasises timing and planning
- > Ability to transfer its knowledge and experience to the field at a high level with its expert staff.
- > Customer satisfaction orientated service after the sale of products and services
- > High brand awareness and shaping of technology.
